

Paul Howard Whistle

Drill the blank (21mm x 95mm) 16mm (5/8") 50mm deep

Mark lines at 18mm and 32mm from the drilled end. Cut the bird mouth as shown in the drawing.

Turn a dowel to be a snug fit the hole, sand or plane a flat as shown (approximately to 14mm)

Push the dowel into the hole until it shows in the bird mouth, test whistle and adjust fipple as

necessary to get a good sound. Super glue in place, (**WARNING ENSURE THE GLUE IS DRY**

BEFOR TESTING AGAIN) Sand or cut the mouth piece. Reverse chuck and turn the other end to the shape you like
